## Hello! I'm a Software Engineer specializing in C# and .NET

I have significant, professional software engineering experience in C# and enjoy working on personal projects to learn new skills and meet new people. I code clean, communicate well, and am super friendly!

## SKILLS

- Languages: C# .NET and ASP.NET
- Tools: Visual Studio, GitHub

## EXPERIENCE

### Blizzard Entertainment – December 2023 to Present

#### Associate Software Engineer

- NET 4.8, ASP.NET 10, C#, WPF, GCP, GKE, RabbitMQ, Octopus Deploy, Kibana, GitHub, GitHub Actions
- Contributed to the development and maintenance of our legacy customer support desktop app built with WPF and C# .NET 4.8 using the MVVM design pattern
- Assisting actively with the development of our new web-based customer support app built with C# ASP.NET 10.0
- Assumed ownership of GM UI, an in-game customer support tool for World of Warcraft
- Proposed and implemented several key improvements to GM UI, including automating the build pipeline using GHA, simplifying the distribution strategy, and coordinating development support from the WoW team. These improvements have streamlined the development process and save us days of engineering effort every month

### Blizzard Entertainment – May 2023 to August 2023

#### Software Engineer Intern

- ASP.NET 7.0, C#, OAuth, GCP, GKE, RabbitMQ, Octopus Deploy, Kibana, GitHub, GitHub Actions, SwaggerUI
- Created a web service using C# and ASP.NET 7.0 to templatize, transform, style, and send Blizzard notification emails as a solo project for the Summer
- Utilized GitHub Actions, Octopus Deploy, and GKE to automatically build and deploy service in Google Cloud
- Learned and followed a new design pattern focused around volatility-based decomposition
- Designed and maintained unit tests to ensure functionality of newly-added and existing features

### Lone Star Analysis – June 2022 to August 2022

#### Software Engineer Intern

- .NET 5.0 MVVM, C#, XAML, WPF, SQLite, BitBucket
- Investigated viability of integrating TelerikUI into our application and presented my findings to company executives which resulted in the team successfully receiving licenses

### Lone Star Analysis – June 2021 to August 2021

#### Software Engineer Intern

- React with Typescript, Django REST Framework, Python, Azure, Docker, PostgreSQL, BitBucket
- Completed JIRA feature and bug tickets and created new tickets for bug reports and feature suggestions. Contributed equally to the project as the full-time software engineers

### Video Game Project Pizza Delivery Bagel – October 2020 to June 2022

#### Programmer, Designer, Artist, Sound Designer, Composer

- Programmed and designed a multi-platform, action-arcade video game in Unity with C#
- Developed game simultaneously for PC, Android, and Arcade Cabinet, and published game commercially on Steam and Google Play marketplaces

- Included a variety of control options on each platform for accessibility (controller support, multiple control schemes, left and right-handed play)
- Utilized the Wwise audio engine for pitch and clip randomization, spacial audio, and simpler audio mixing
- Implemented a 3rd party terminal tool to allow executing debug commands in-game

### **Participated in 15+ Game Jam Challenges**

- Programmed and designed video games in teams of 2-8 under tight time restrictions

#### **Game Jam Catiarmi – June 2024**

Programmer, Team Lead (Team of 7)

- Created a pet-sim web game using Microsoft Blazor, C#, and ASP.NET 7.0
- Communicated actively with team members and created a game design document, asset list, and project timeline to ensure project alignment and on-time completion of assets
- Designed game systems with a UML diagram and split programming tasks with a co-programmer to ensure completion of the project by the deadline

#### **Game Jam Grombcross – August 2022**

Programmer, Team Lead (Team of 5)

- Programmed a nonogram puzzle video game in WPF with .NET 6.0 MVVM, C#, and XAML
- Created a save system that saves and loads puzzle completion states and settings as a json file
- Created a puzzle generation system that generates new puzzles from a pair of bitmap images

## **EDUCATION**

### **University of Texas at Dallas (GPA: 3.814) – December 2023**

- Degree: Bachelor of Science in Computer Science

## **LEADERSHIP**

### **The Student Game Developer Association at UTD – December 2021 to December 2023**

Senior Officer, Treasurer

- Assisted in planning and hosting events
- Created promotional materials such as the club tri-fold display and custom stickers

### **The SpongeBob Club at UTD – September 2019 to February 2022**

Founder, President

- Hosted events, designed promotional posters, and managed a 120+ member Discord server
